

PHANTOMPARK™

Offered exclusively by American Custom Lifts

PHANTOMPARK™

Made in America

COMMERCIAL AND RESIDENTIAL APPLICATIONS

The PhantomPark™ is a dream for auto aficionados who like to maintain a hands-on relationship with their machines. For uncompromising property owners who need safe and affordable parking space, this 2-deck drive-on lift is a smart solution for both commercial and residential applications.

CUSTOM AND STANDARD SOLUTIONS

While most lift manufacturers recommend a 10-foot garage ceiling for adequate clearance, PhantomPark™ makes it possible to use a garage with a lower ceiling height. PhantomPark™ utilizes a basement area below the garage or a pit constructed in the garage floor. You drive the car onto the lift, which is then lowered into the subterranean space, and then you drive the second car into the garage-floor-level parking space. If you have a high enough garage ceiling, it is possible to retrieve the lower vehicle without having to remove the upper vehicle.

KEY BENEFITS

- Double your space by parking two vehicles in the footprint of one parking stall
- Unobtrusive and secure – the lift and lower vehicle are completely concealed
- Aesthetically pleasing – canopy surface can be tiled or covered with other materials to match the surroundings
- Multiple units can be installed side by side for use in condos, offices, etc.
- Ideal for low-ceiling applications
- Increase property value
- Safe, easy to operate
- Made in America

STANDARD FEATURES

Electrical

- 230V single-phase Motor Control Panel.
- "UP/DOWN" Operator Push Button Station.
- Solenoid-Operated Down Valve.

Safety

- Pilot-operated check valve "velocity fuses" on each cylinder to lock lift into place in the event of a catastrophic hose failure.
- Beveled toe guard protection around perimeter of each deck.
- Overpressure protection in the hydraulic circuit to prevent the system from exceeding the 3,000 psi maximum allowable working pressure.
- Maintenance devices are provided to support an empty lift in a raised position when engaged for safe inspection, maintenance, and repair.

AVAILABLE OPTIONS

- Ultrasonic vehicle sensor and wheel positioning blocks for proper car positioning.
- Emergency Stop "Panic" Button.
- Door Safety Solenoid-Operated Interlock System.
- Vehicle-Present Sensor at upper level to prevent lift movement if vehicle is parked on the canopy deck.
- Photo-eye sensors to shut off lift if motion is detected during operation.
- Larger Power Units for increased lift speeds.
- Other options available including custom applications.
- 10 HP 230V 1 Phase Power unit, raising time approximately 65 seconds.
- 15 HP 230/460 3 Phase Power unit, raising time approximately 65 seconds.

AC LIFTS

American Lift Systems, Inc.
(DBA American Custom Lifts)

American Custom Lifts is dedicated to solving problems related to the parking, storage and transportation of vehicles, and materials, from small to large. We're headquartered in Escondido, California, with service centers in every major city in the United States, as well as in several international cities. We strive to provide excellent customer service in every phase of your lift purchase, from research to installation; our goal is to make you a satisfied customer.

Because of the talented people who motorize and drive American Custom Lifts beyond the standard, American Custom Lifts now occupies the leadership in development of both hydraulic and mechanical lifting systems. Since our inception in 1998, we have diversified to designing and marketing custom design lifts, material handling equipment, and parking solutions, one of our specialties. We offer the widest variety of material handling equipment and parking solutions, including the only American-made subterranean scissor lift that is code compliant in every U.S. city, as well as a code compliant 4-post model: the one-and-only PhantomPark™.
